DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, Figure 1A

Species II, Figure 1B

Species III, Figure 1C

Species IV, Figure 1D

Species V, Figure 1E

Species VI, Figure 1F

Species VII, Figure 1G

Species VIII, Figure 1H

Species IX, Figure 1I

Species X, Figure 1J

Species XI, Figure 1K

Species XII, Figure 1L

Species XIII, Figure 2

Species XIV, Figure 3

Species XV, Figures 4-4c, 6

Species XVI, Figure 5

Species XVII, Figure 7

Species XVIII, Figure 9

Species XIX, Figure 10

Species XX, Figure 11

Species XXI, Figure 12

Species XXII, Figure 13

Species XXIII, Figure 14

Species XXIV, Figure 14a

Species XXV, Figure 14b

Species XXIX, Figure 17

Species XXX, Figure 17a

Species XXXI, Figures 18, 18a

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 3643

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Currently, the claims are in such a condition the examination is not possible. Most of the claims are formed of multiple sentences. Claim 1 is currently a combination of numerous inventions not related to each other placed together. Different concepts or species cannot be set forth in a single claim. Further, the dependent claims 2-19 pick certain species from claim 1 and expand on them, as such it is impossible to determine

Art Unit: 3643

the scope of these claims. In addition to the election above Applicant must rewrite the claims into proper US format in response to this Office Action.

The specification and drawings are also inadequate. Several of the drawing figures are confusing to the point of not being able to distinguish the features of the invention. Also, many of the reference numbers are poorly written so it is difficult to determine the number. Finally, the specification fails to identify numerous reference numbers, refers to the same element by different terms and lacks detailed explanation as to the specifics of the invention.

In response to this action formal drawings are required and the specification must be rewritten to provide a clear description of the invention. Applicant is cautioned that no New Matter may be added in making these corrections.
